EDUCATION

High School Diploma

Misgav High School

06/2016

Full Stack Development

Coding Academy

11/2022 - 02/2023

Full Stack Developer

- Comprehensive Full Stack Bootcamp: Successfully completed an intensive and comprehensive full stack bootcamp, gaining a solid foundation in both front-end and back-end web development. Acquired proficiency in HTML, CSS, JavaScript, and modern frameworks such as React and Node.js.
- Hands-On Project Experience: Applied theoretical knowledge to real-world projects throughout the bootcamp, demonstrating practical skills in designing and implementing dynamic web applications. Collaborated with a diverse team to develop interactive and responsive websites, showcasing the ability to work effectively in a team-based environment.
- Problem-Solving and Debugging Skills: Developed strong problem-solving and debugging skills through rigorous coding challenges and exercises. Proficient in identifying and resolving issues, ensuring smooth functionality and optimal performance of web applications. Exhibited adaptability and the ability to overcome challenges in a fast-paced, immersive learning environment.

WORK EXPERIENCE

Combat Soldier and Commander

Israel Defence Forces

11/2016 - 07/2019

Achievements/Tasks

- Led a team of fighters as part of an operational line, ensuring effective coordination and mission success.
- Trained in intensive infantry fighter programs for 8 months, mastering combat tactics and strategies in extreme field conditions.
- Completed the Class Commanders Course, honing leadership, decision-making, and problem-solving skills.
- Demonstrated a strong commitment to the well-being of team members through home visits, medical care coordination, accommodation arrangements, and ensuring adequate food supplies during missions.
- Transferred valuable knowledge and lessons learned to enhance team performance and preparedness.

PROJECTS

Workflow - list-making application, Trello clone (01/2023 - 02/2023)

- Collaborated with two teammates to build a Trello clone app from scratch, taking on both front-end and back-end responsibilities and completing the project within the set deadline.
- Developing and implementing real-time updates and notifications, so that users could be informed of any changes to their projects in real-time.
- Developed a user-friendly drag and drop functionality in the Trello clone app, improving user engagement and satisfaction.

MrBitcoin, a digital wallet app for keeping and transferring Bitcoins (02/2023 - 02/2023)

- A logged in user can transfer Bitcoins from his balance to any of his contacts.
- The user can edit, add and remove contacts.
- The app uses an API to fetch and display information about the trade volume and exchange rate of Bitcoin.
